FOR IMMEDIATE RELEASE

ALDER STREET ROADSIDE WORK SCHEDULED FOR MARCH 18 & MARCH 24, 2020

AT&T crews will be stringing a new aerial fiber cable along the alleys on either side of McPherson Street, between Alder and Redwood Streets and between those alleys along Alder Street. This project is scheduled for Wednesday, March 18 and Tuesday, March 24, between 9:00 AM and 3:00 PM.

It is anticipated that the majority of the work on Alder Street will be accomplished via the shoulder/parking area to minimize disruption of traffic with the attempt to keep both lanes open; however, a temporary lane closure is possible. No Parking signs will be placed in the project area 48 hours in advance to enable the workers to use the shoulder and keep the traffic lanes open. Work in the alleys may require a partial lane closure, but they are expected to remain open to thru traffic. Pedestrian traffic will be redirected to the south side of Alder Street while work is occurring on the north side.

Drivers are reminded to drive with caution in the project zones, and if possible, to park and use alternate roadways.

Questions regarding this information should be directed to Diane O'Connor, Engineering Technician, at doconnor@fortbragg.com or (707) 961-2823 ext. 134.
